

Call for Applications – Win a Free CST Potential Analysis for Decarbonising Your Energy Processes

OPEN TO ALL INDUSTRIES IN TÜRKİYE & GERMANY | APPLICATION PERIOD: 5 May – 16 June 2025

The potential of concentrated solar thermal (CST) energy for supplying renewable process heat to industry and the municipal sector is widely underestimated. Within the Turkish-German Energy Partnership, we strive to demonstrate this potential on the basis of specific use cases to support a rapid market ramp-up. For this purpose, we award two partner companies, one each in Türkiye and Germany, with a CST potential analysis at their operation site.

YOUR BENEFITS

INDIVIDUAL SOLUTION FOR YOUR BUSINESS

Receive a free assessment of your current heat processes as well as a CST feasibility assessment and recommendations for actions.

ECONOMICS AND SUSTAINABILITY

Identify concrete saving potentials while reaching your sustainability targets.

INTERNATIONAL KNOWLEDGE TRANSFER AND NETWORK

Exchange with leading stakeholders and technology providers in the field of solar thermal energy and broaden your network of international energy experts.

WHO CAN APPLY

Companies and industries in Türkiye and Germany interested in decarbonising their process heat consumption.

HOW TO APPLY

Fill out the application and send it to us by **June 16th**. We want to learn about your thermal processes and motivation for decarbonisation.

For further information and the application documents, please contact us at tgep@dena.de.
